MAQAM Digital

The monthly WordPress check

Six checks that stop most website emergencies. Do them on the 1st of every month.

1. Take a backup, and test it restores.

Why: A backup you've never restored is a guess.
How: Restore it to a staging copy, or use your host's restore option.

☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun ☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec

2. Update one thing at a time.

Why: If something breaks, you know what caused it.
How: WordPress core, then theme, then plugins. Check the site after each.

☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun ☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec

3. Send yourself a test enquiry.

Why: Forms break quietly, and missed enquiries cost the most.
How: Fill in every form on the site and check the email arrives.

☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun ☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec

4. Check mobile speed.

Why: Google treats a Largest Contentful Paint of 2.5s or less as good.
How: Run your homepage through PageSpeed Insights, mobile tab.

☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun ☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec

5. Update hours and contact details.

Why: Wrong hours send customers to a closed door.
How: Make sure your website and Google Business Profile match.

☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun ☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec

6. Check domain and SSL renewal dates.

Why: An expired domain or certificate takes the whole site offline.
How: Put both renewal dates in your calendar.

☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun ☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec

Rather have this done for you?

Free audit: send us your link. Website care from £95/month.
